Just The Facts #4 Commercial Hen Comparison

Does breed really matter? Each individual economic trait (body weight, feed conversion, and livability) is important. However when combined, these traits clearly demonstrate the impact that breed choice makes on your operation. This data is based on results of **over 6,000,000** hens from January to June 1999, from North Eastern USA.

	Hybrid	BUTA	Nicholas
Livability (%)	93.52	93.27	93.70
Age (days)	95.2	95.7	100.4
Weight (kg)	7.46	7.07	7.44
ADG (grams)	78.4	73.9	74.1
Feed Conversion (Adjusted to 6.4 kg)	2.04	2.10	2.12

What does this mean to you?

Hybrid puts more money in your pocket!
